The Little Manistee Watershed Conservation Council is leading an effort to protect, preserve and enjoy the Little Manistee River Watershed by bringing together the watershed community to develop a Watershed Management Plan.

The Watershed Management Plan is based on a compilation of the status of the watershed environment and an understanding of how the watershed community desires to utilize the shared resources for economic, recreational, residential and other purposes. It helps the community agree on the desired future state of the river and form a plan for how we get it there.

The Little Manistee River is a major reason each of us lives in or visits the area. Please share your thoughts with us.
